

Encyclopedia of Ukraine: An Aid in Decision-Making

The last few years have seen Ukraine finally emerge onto the world stage. However, after being hidden from the West by the Iron Curtain for so many years, the fact is that many people know very little about this historic country and its 53 million inhabitants. Current, up-to-date information - data, statistics, news, reports and analyses - that tell what is happening now are increasingly available in the commercial press, in magazines such as this *Monitor*, from consultants and the government. However, knowing what is happening in Ukraine today is seeing only half the picture. To make the picture complete and to provide the basis for reasoned decision-making by those doing business with Ukraine, it is just as important to understand what led to today's situation and to put these developments into perspective. This background information has until now not been readily accessible in English, but that situation has changed with the recent publication of the five-volume English-language *Encyclopedia of Ukraine*, containing some 15,000 entries and covering every aspect of Ukrainian life. Published by the University of Toronto Press, the editors-in-chief of the *Encyclopedia of Ukraine* were, successively, Prof. Kubijovyc and Prof. Danylo Husar Struk. It is a joint undertaking of the Shevchenko Scientific Society of Sarcelles (France), the Canadian Institute of Ukrainian Studies (University of Alberta), and the Canadian Foundation of Ukrainian Studies.
